BandwidthX Selected to Join Facebook Accelerator: Connectivity

CARLSBAD, Calif. – After a competitive selection process, BandwidthX today announced it has been selected to join Facebook Accelerator: Connectivity. The startup accelerator program is designed to identify promising connectivity startups that provide innovative solutions to improve the availability and affordability of internet across the Americas. The 12-week program began on November 9th and gives 20 chosen startups the opportunity to partner with Facebook Connectivity to help scale their businesses.

"BandwidthX is very pleased to join Facebook Accelerator: Connectivity. It is a great opportunity to further grow the adoption of our cloud services. Our solutions maximize existing mobile network capacity bringing significant performance improvements and cost reductions to the mobile industry," says BandwidthX CEO Pertti Visuri. "We look forward to collaborating with Facebook Connectivity and other wireless ecosystem players."

"By supporting startups focused on improving connectivity, we can work together to help bring faster, more reliable internet to people around the world," said Vish Ponnampalam, Wireless Systems Engineer for Facebook Connectivity. "We look forward to working with BandwidthX to help strengthen and scale their impact with mobile networks."

BandwidthX provides cloud services to unlock existing capacity in mobile networks. The solutions work in both single operator networks and across multiple independent networks increasing efficiency and utilization. These gains extend the capacity and coverage of data networks, create CapEx and OpEx savings, and improve connectivity for mobile subscribers.

About BandwidthX

BandwidthX provides cloud services to unlock existing capacity in mobile networks. The increase in efficiency and utilization extends the capacity and coverage of data networks, creates CAPEX and OPEX savings, and enhances network performance for mobile subscribers. The company's initial business was based on Wi-Fi capacity with tens of millions of mobile devices and access points active on its platform. Its services have grown to include cellular capacity (LTE and 5G) with the Xpacity platform. It has opened a completely new dimension in network management and optimization for Mobile Network Operators. With BandwidthX's award winning products, everyone in the mobile data ecosystem wins: from mobile and network operators to equipment and software vendors and services providers and, of course, the end users of mobile devices.
